

Setting up application environment

Date	13 th November 2022
Team ID	PNT2022TMID30805
Project Name	Inventory Management System For Retailers

DOCKER CLI INSTALLATION

```
C:\WINDOWS\system32\cmd.exe
inspect      Return low-level information on Docker objects
kill         Kill one or more running containers
load         Load an image from a tar archive or STDIN
login        Log in to a Docker registry
logout       Log out from a Docker registry
logs         Fetch the logs of a container
pause        Pause all processes within one or more containers
port         List port mappings or a specific mapping for the container
ps           List containers
pull         Pull an image or a repository from a registry
push         Push an image or a repository to a registry
rename       Rename a container
restart      Restart one or more containers
rm           Remove one or more containers
rmi          Remove one or more images
run          Run a command in a new container
save         Save one or more images to a tar archive (streamed to STDOUT by default)
search       Search the Docker Hub for images
start        Start one or more stopped containers
stats        Display a live stream of container(s) resource usage statistics
stop         Stop one or more running containers
tag          Create a tag TARGET_IMAGE that refers to SOURCE_IMAGE
top          Display the running processes of a container
unpause      Unpause all processes within one or more containers
update       Update configuration of one or more containers
version      Show the Docker version information
wait         Block until one or more containers stop, then print their exit codes

Run 'docker COMMAND --help' for more information on a command.
